**SIGNS & SYMPTOMS THAT
CAN INDICATE DIABETES:**

- Unusual thirst
- Frequent urination
- Weight gain / loss
- Extreme fatigue or lack of energy
- Recurring infections
- Cuts & bruises that are slow to heal
- Tingling or numbness in the hands or feet

**CONTACT YOUR HEALTH CARE
PROVIDER RIGHT AWAY IF YOU,
OR SOMEONE YOU KNOW,
EXPERIENCE ANY OF THESE.**

However, even without symptoms, adults 40 or older should still get checked; many people with Type 2 diabetes may not display symptoms.
